WORK EXPERIENCE

TD Securities

Engineering Manager

Senior Software Developer

Software Developer

Toronto, ON

July 2024 – Oct 2025

Sept 2021 – June 2024

June 2018 – Aug 2021

- Act as a tech lead by helping users in front office and market risk to make informed decisions on business planning, identify issues and recommend tech solutions. Manage full project lifecycle - user requirements gathering, impact assessment, prototyping, implementation, UAT to delivery.
- Built the risk management application, Risk Capital Studio (RCS), from scratch using JavaScript, React, MobX, Node.js, and focused on risk metrics such as VaR, FRTB, IRRBB, EVE Scenario PnL. Manage data lifecycle from sourcing (using REST APIs and JSON data), validation format data and visualization and display excel-like tables (using AgGrid libraries).
- Worked closely with the market risk analysts to build up a display dashboard and automate workflow of limits, breaches, exposures, adjustments and publishing. Overall reduced 50% of market risk team daily reporting time.

Global Relay

QA Analyst Automation (co-op)

Vancouver, BC

May 2015 – Feb 2016

- Helped product management team in the testing phase in maintaining and creating ~10,000 automation test suites using Selenium and Java frameworks. Performed root cause analysis on any failed test, tracked issues using JIRA, conducted AB testing to spot the optimized solution. Saved 80% of testing time for manual QA and product management team.

SAP

Software Developer in Test (co-op)

Vancouver, BC

Sept 2014 – April 2015

- Supported the Development team by writing and executing manual regression test cases, reported bug fixes using JIRA, tracked and followed any critical issues to the team in a timely manner. Initiated in building the team's first selenium automation test cases using Java. Saved 100% of Developers' time in feature and regression testing.

EDUCATION

University of British Columbia
