# Helen Yin

**AI ENGINEER | DATA & SOFTWARE PLATFORMS**

Toronto, ON · +1 (778) 871-1408 · hksh.yin@gmail.com · **https://9helen.github.io/** · **https://www.linkedin.com/in/9hyin/**

## PROFILE

Technical product and engineering leader with 7+ years building data-intensive software for financial risk teams. Turns user needs into requirements, prototypes and shipped capabilities, partnering across business and engineering from impact assessment through UAT. Combines hands-on full-stack experience with a record of improving decision workflows and reducing reporting effort.

## PRODUCT & TECHNICAL TOOLKIT

### PRODUCT DELIVERY

Requirements gathering · impact assessment · prototyping · cross-functional delivery · UAT · workflow automation

### TECHNOLOGY & ANALYTICS

JavaScript · React · MobX · Node.js · REST APIs · JSON · AgGrid · Selenium · Java · JIRA · Git · Codex

## WORK EXPERIENCE

**TD Securities** — Toronto, ON
**Engineering Manager** — Jul 2024 – Oct 2025
**Senior Software Developer** — Sept 2021 – Jun 2024
**Software Developer** — Jun 2018 – Aug 2021

- Led end-to-end delivery for Front-Office (FO) and Market Risk teams, gathering requirements, assessing impact, prototyping solutions, and coordinating implementation, UAT and release.
- Built Risk Capital Studio (RCS) from scratch with JavaScript, React, MobX and Node.js; supported VaR, FRTB, IRRBB and EVE scenario analytics with validated data and interactive, spreadsheet-style views.
- Partnered with analysts to build risk dashboards and automate limits, breaches, exposures, adjustments and publishing, reducing daily reporting time by 50%.

**Global Relay** — Vancouver, BC
**QA Analyst Automation (Co-op)** — May 2015 – Feb 2016

- Maintained and expanded approximately 10,000 Selenium/Java test cases; analyzed failures, tracked issues in JIRA and supported A/B tests, reducing manual QA time by 80%.

**SAP** — Vancouver, BC
**Software Developer in Test (Co-op)** — Sept 2014 – Apr 2015

- Wrote regression tests, tracked defects in JIRA and helped create the team's first Selenium/Java automation cases, reducing manual feature and regression testing effort.

## EDUCATION

**University of Toronto (St. George)** — Toronto, ON
**Non-degree program** — Sept 2024 – 2025

Relevant coursework: Art History, Canadian Paintings, Modernism, Architecture Rituals, Photography, French.

**University of British Columbia** — Vancouver, BC
**BSc, Computer Science; minor in Commerce** — May 2018

Relevant coursework: Algorithms, Data Structures, Databases, Economics, Accounting, Finance.

**Technische Universität Darmstadt** — Darmstadt, Germany
**Exchange Program** — Feb – Aug 2016

Relevant coursework: TLA+, Computer Communication Systems, AI project (academic), German.
